CP-34 Charter Signed 5 December 2019

The Information Technology Management (ITM) Career Program Planning Board charter was signed on 5 December 2019. This board monitors and reviews the strategic environment, workforce and demographic diversity trends, competency assessments, and gap analyses. Additionally, the board ensures that recruitment, retention, and development initiatives address current and future mission requirements. Committee charters are valid for up to 3 years.

Congratulations to CP-34 SETM Selectees

Ready, Set, Launch ECMO March 2020!

General Crawford has announced that the Enterprise Cloud Management Office (ECMO) is expected to fully operate by March 2020. Pursuing the force's data strategy will modernize and safeguard the Army network-

enabling the Army to compete with leading great powers. ECMO will primarily function to serve as the cohesive, dedicated cloud migration resource for Army data and application owners. Read [more...](#)

Top 5 Tech Predictions of 2020:

The Army will require reskilling of the next-gen workforce to keep up with the tech landscape. The 5 most important federal Government tech predictions to watch in 2020:

1. Quantum computing takes a quantum leap.
2. Everything-as-a-service goes mainstream.
3. Supply chain security becomes critical.
4. Ambient technology energizes workers.
5. Artificial Intelligence continues.
