The Vantage system provides senior leaders access to "All Army Data" in order to better inform strategic decisions by displaying past, current and future total force data, producing predictive analytics and facilitating real-time or near real-time decision making displays. The solution will ingest, integrate, analyze and visualize information from across the total Army. It will apply machine learning and artificial intelligence to generate insights unavailable in siloed systems. Targeted users include senior leaders at the Headquarters Department of the Army (HQDA) Secretariat, the Army Staff and at designated leaders in the chain of command of Army Commands (ACOMs), Army Service Component Commands (ASCCs), Direct Reporting Units (DRUs) and Field Operating Agencies (FOAs). The Vantage has a NIPR and SIPR instances with an authorization to operate with approved one-way Cross domain solution covering both environments.
