

U.S. ARMY

# Army 365 Transition

WHAT YOU NEED TO KNOW ABOUT ARMY 365

## WHAT'S HAPPENING?

The Army is moving to Army 365, to replace Commercial Virtual Remote (CVR)/Teams that we have used over the last year. CVR will be discontinued on 15 June 2021. The shift to Army 365 significantly improves operational effectiveness, increases cybersecurity and defensive cyber operations (DCO) posture at a considerably reduced cost.

### Transition occurs in three Phases:

- **Phase 1:** Teams Migration - ongoing creation of accounts that Army users will use to transition.
- **Phase 2:** Email Migration - Transition from Defense Enterprise Email (DEE) to an email service existing within the Army 365 environment.
- **Phase 3:** SharePoint Migration - Establishing full functionality of OneDrive (cloud-based storage) and Army 365 SharePoint.

## WHY THE TRANSITION?

- **Readiness:** Army 365 will deliver greater capabilities than what is found in CVR and provides elevated security by embracing cloud-based solutions to enhance workplace efficiency, productivity, and collaboration.
- **Modernization:** Army 365 is a secure, cloud-based suite of products that merge Microsoft Office applications we use daily with voice, video, chat, and file sharing capabilities.
- **Cybersecurity:** The Army stays ahead of cyber threats by adopting proven secure solutions that balance the benefits of commercial cloud services with the need for information and cybersecurity.

## HOW DOES IT AFFECT ME?

- Each user is required to back up their respective information from CVR/Teams and manually transfer to Army 365. Data will not automatically transfer.
- Guests, to include industry, academia and other mission partners, will be able to dial in via guest access and telephone bridges.
- Users will not have access to Army 365 using a personal mobile device.

## ARMY 365 ACCESS

MIL/CIV/Ctr employees will have access to the cloud-based Army 365 by using their CAC and current email prefix but with @army.mil as the ending. (For example john.smith.12345.civ@army.mil). Army 365:

- Is CAC-enabled in lieu of a password.
- Only accessible on NIPR networks or VPN.
- In the near future accessible with a personnel device with a CAC and web-browser.
