

U.S. ARMY

Mission and Installation Contracting Command

The U.S. Army Mission and Installation Contracting Command is a major subordinate command of the U.S. Army Contracting Command. MICC Soldiers, civilians and contractors support Soldiers and their families in the continental United States and Puerto Rico by delivering ready, decisive and synchronized business solutions and contracting support to the Army enterprise.

Headquartered at Joint Base San Antonio-Fort Sam Houston, Texas, the MICC is a one-star command made up of about 1,500 Soldiers and Civilian employees assigned to two contracting support brigades, two field directorates, 10 contracting battalions and offices across 30 locations within the continental United States that provide contracting support to the Army enterprise.

The MICC delivers the power of Army contracting by acquiring equipment, supplies and services vital to the U.S. Army mission and well-being of Soldiers and their families. The command also supports the Army's contingency and wartime missions by rapidly deploying trained and ready contingency contracting Soldiers around the world to procure goods and services in austere environments to win in multi-domain operations. Contracting brigades and battalions are strategically aligned to provide operational contract support to their respective corps or divisions when deployed. MICC-contracted services and supplies touch virtually every Soldier in the Army – from facilities support services, commercial and institutional building construction, and administrative and general management consulting services to wired consulting services, telecommunication and engineering services, contracted food services, advertising and transition services. The MICC ensures America's Soldiers and their families have what they need during and after military service.

ACC designated the MICC as its lead for installation readiness to provide the acquisition insights and ensure

MICC WORKFORCE

419th Contracting Support Brigade, Fort Liberty, North Carolina

- MICC-Fort Liberty/900th Contracting Battalion/905th Contracting Battalion, Fort Liberty, North Carolina
- MICC-Fort Campbell/922nd Contracting Battalion, Fort Campbell, Kentucky

- MICC-Yuma Proving Ground, Yuma, Arizona

FDO-Fort Sam Houston, JBSA-Fort Sam Houston, Texas

- Installation Readiness Center
- Government Purchase Card Program Management Directorate
- MICC-Fort Belvoir, Fort Belvoir, Virginia
- MICC-Fort Knox, Fort Knox, Kentucky
- MICC-Fort Sam Houston, Joint Base San Antonio-Fort Sam Houston, Texas

FDO-Fort Eustis, Joint Base Langley-Eustis, Virginia

- MICC-Carlisle Barracks, Carlisle, Pennsylvania
- MICC-Fort Eustis, Joint Base Langley-Eustis, Virginia
- MICC-Fort Eisenhower, Fort Eisenhower, Georgia
- MICC-Fort Gregg-Adams, Fort Gregg-Adams, Virginia
- MICC-Fort Leavenworth, Fort Leavenworth, Kansas
- MICC-Fort Leonard Wood, Fort Leonard Wood, Missouri
- MICC-Fort Moore, Fort Moore, Georgia
- MICC-Fort Novosel, Fort Novosel, Alabama
- MICC-Fort Sill, Fort Sill, Oklahoma
- MICC-West Point, West Point, New York

Army installations are capable of supporting current and evolving readiness and power projection requirements.

Both uniformed and civilian members of the MICC played an integral role in the Army's response to the national COVID pandemic. As the ACC lead element for the Defense Department's COVID response efforts, the MICC synchronized and integrated all contracting efforts across the Northern Command area of operations in support of the Federal Emergency Management Agency's national level support construct of moving medical personnel to points of need around the country. Leading that MICC effort was the Fort Sam Houston Field Directorate Office, which served as the senior contracting official for U.S. Army North. ARNORTH serves as the Joint Force Land Component Command for all federal ground troops, including other service units serving on land as part of the DOD's COVID response. The senior contracting official leveraged capabilities from the MICC's two field directorates and two brigades as well as each of ACC contracting centers to enable the rapid deployment and life support services for more than 3,500 medical professionals, augmenting hospital staffs and establishing multiple alternate care treatment facilities across 15 major cities nationwide all the while maintaining the installation and operational readiness needs of mission partners.

Also, contracting professionals from across the MICC's 419th and 418th Contracting Support Brigades also played a pivotal role by providing contracting support for the Department of State's mission of relocating special immigrant applicants as part of the America's initiative to follow through on its commitment to Afghan citizens who helped U.S. forces.

Contracting Soldiers from across the command also play a vital operational role in support of combatant commanders. MICC Soldiers and Civilians serve as force providers in contingency contracting for Operation Freedom's Sentinel, Operation Inherent Resolve, Atlantic Resolve and the NATO-led Resolute Support as well as multiple contingencies across the globe.

The MICC's primary supported activities include the U.S. Army Installation Management Command, U.S. Army Forces Command, U.S. Army Training and Doctrine Command, U.S. Army North, U.S. Army Test and Evaluation Command, U.S. Army Reserve Command, U.S. Army Military District of Washington, U.S. Army Medical Command, U.S. Army Futures Command and United States Military Academy at West Point.

MICC contracts are vital in feeding more than 200,000 Soldiers every day, providing many daily base operations support services at installations, preparing more than 100,000 conventional force members annually, facilitating training for more than 100,000 students each year, and maintaining more than 14.4 million acres of land and 170,000 structures. In fiscal 2023, the command executed more than 24,000 contract actions valued at more than \$5.64 billion across the Army, including \$2.98 billion to American small businesses. The command also manages the Army's largest and most complex Government Purchase Card Program, administering more than 389,000 GPC transactions in fiscal 2023 valued at an additional \$666.2 million.

With a wealth of contracting expertise, MICC professionals are dedicated to providing the highest quality of contracting support to all of their mission partners, whenever and wherever needed. The responsive contracting solutions and oversight provided by the command serve as a force multiplier in ensuring the Army is ready to fight and win.
