

CHAPTER 27
FIELD OPERATING AGENCIES (FOA) AND
ARMY MANAGEMENT HEADQUARTERS ACTIVITIES (AMHA)

The objective or purpose of the Army is clearly articulated in title 10 of the United States Code.

It is the intent of Congress to provide an Army that is capable, in conjunction with the other armed forces, of:

- (1) preserving the peace and security and providing for the defense of the United States, the Territories, Commonwealths, and possessions and any areas occupied by the United States;
- (2) supporting the national policies;
- (3) implementing the national objectives; and
- (4) overcoming any nations responsible for aggressive acts that imperil the peace and security of the United States.

Although these objectives have been stable over the years, the organizational environment has been extremely dynamic. Hence, the Army has undergone continuous change in order to meet its objectives. The Army of the United States must be organized, trained, and equipped to meet all threats over the entire continuum of hostility from terrorism through nuclear exchange. The most obvious display of the Army's organizational adaptability is the constant evolution of its tactical formations. Failure to adapt tactical organizations to new doctrine and equipment would result in a greatly reduced capability to counter the threat. Less obvious, but of equal importance is, the adaptability of the Army's management structure. The consequences of a failure to adapt the management organizations to accommodate the imperatives generated by our evolving organizational environment, although less apparent, would be just as harmful.

Congress, the Department of Defense (DOD), and the Army share the common goal of effective, efficient management organizations. The Goldwater-Nichols DOD Reorganization Act of 1986 established specific strength limitations on both the size of Headquarters, Department of the Army (HQDA), and lower level management headquarters, in titles V and VI respectively. Department of Defense Directive (DODD) 5100.73, Department of Defense Management Headquarters and Headquarters Support Activities, was first published 8 November 1973. It has been revised three times since then, in 1975, 1981, and most recently in 1985. The purpose of the directive is to establish a system to identify and manage the number and size of Management Headquarters and Headquarters Support activities in the Department of Defense. Army Regulation 570-8, Army Management Headquarters Activities (AMHA), published 4 November 1975, prescribes policies and assigns responsibilities for management of

resources allocated to Army management headquarters activities and defines management headquarters functions and identifies Army management headquarters activities that are to be managed. AR 570-8 has never been updated. Additional guidance is contained in Chief of Staff Regulation 5-4, Management of Army Staff Field Operating Agencies (FOA), dated 8 February 1984. This regulation is entirely devoted to managing FOA and establishing procedures for developing, processing, reviewing, revising, approving, and publishing tables of distribution and allowance (TDA) for FOA.

In 1972, a change in the manpower accounting system caused certain Class II activities (organizations reporting directly to HQDA, rather than the Continental Army Command) to be redesignated as either staff support agencies (SSA) or FOA. Most were designated SSA, only a few as FOA.

Since the CONUS Reorganization of the Army in 1973, the Army has explicitly attempted to separate management from operations. The premise being that certain organizations should concentrate their efforts on management, i.e., developing policy and guidance; long range planning; allocation of resources; and evaluating program performance; rather than day to day operations and near term decision making. Logically, it was believed that this scheme would both improve long range planning and permit smaller, more manageable headquarters. The proliferation of field operating agencies, within the Army's management structure, is an effect of the efforts to separate management and operations.

The Dictionary of United States Army Terms, AR 310-25, defines management headquarters, operation headquarters, staff support agency, and field operation agency as follows:

management headquarters: A headquarters primarily concerned with long-range planning, programming, and budgeting of resources; the development of policies and procedures and; coordination of effort, and evaluation, as opposed to the planning for, and direct control of operations.

operation headquarters: A headquarters primarily concerned with command and control of the execution of operational missions.

field operating agencies:* An agency under the supervision of Headquarters, Department of the Army, but not a major Army command or part of a major Army command, which has the primary mission of executing policy.

staff support agency:* An agency at Headquarters, Department of the Army, level which assists Headquarters, Department of the Army, and which would not exist in the

absence of Headquarters, Department of the Army. A staff support agency assists in the formulation of policies and procedures or provides necessary administrative and/or logistical support for Headquarters, Department of the Army.

***Note:** Major Army commands have organizational counterparts to the HQDA staff support agencies and field operating agencies. These organizations are referred to as activities rather than agencies when subordinate to MACOM. The functions performed by the activities for the MACOM to which assigned are intended to be analogous to those of the agencies for HQDA.

Even a superficial review of the Army's attempt to manage management activities over the last fifteen years clearly indicates that the management of management headquarters and field operating agencies are recurring organizational problems. Chief of Staff Memorandum 74-10-27 addressed the realignment of FOA resulting from the CONUS reorganization of 1973. In 1977, the Secretary of Defense (SECDEF) directed a 25% reduction in the strengths of the Service headquarters. The bulk of the HQDA reduction was accomplished through the conversion of staff support agencies (SSA) to field operating agencies and similar actions. The manpower of FOA increased from 32,173 in FY 74 to 44,479 in FY 78. The vast majority of this increase is attributable to the transition to an all volunteer force. The United States Army Recruiting Command (USAREC) and the Military Entrance Processing Command (MEPCOM) account for 85% of the 12,306 space increase in FOA manpower. The remaining 15% are essentially attributable to the conversion of SSA to FOA. In 1979, the Secretary of the Army (SA) and Chief of Staff of the Army (CSA), faced with the prospect of continuing manpower constraints, required the HQDA principals to identify ARSTAF functions that could either be eliminated or reduced as an alternative to another across the board "salami slice" reduction. By 1981, fifty-three separate ARSTAF FOA could be identified. A review of FOA functions and missions was undertaken for the purpose of consolidating or eliminating FOA. In 1984, an increase of 127 spaces in FOA corresponded to a 5% reduction (160 space) in AMHA manpower. The 1987 reorganization of HQDA, required by the Goldwater-Nichols Act to comply with strength ceilings, was generally, accomplished by the creation of new FOA or the redistribution of manpower spaces from HQDA to existing FOA. The ROBUST Task Force identified 187 unit identification codes in its baseline (8909) data base (which excludes joint activities, such as MEPCOM), associated with field operating agencies. The Department of the Army Inspector General was tasked to do a special inspection of FOA concurrent with the ROBUST Task Forcer review of TDA. Recurring organizational problems are symptomatic of malorganization.

Another symptom of malorganization is the diversion of the attention of key people from central issues to peripheral or secondary problems. The Army leadership has had to devote time and energy annually since 1972 to the management of AMHA and FOA.

FOA and SSA exist at the major Army command (MACOM) level as well at HQDA. The difference in designation is that they are "activities" rather than "agencies" when subordinate to a MACOM. Management of these activities is inconsistent among MACOM. This is attributable to a lack of regulatory guidance, a lack of discipline in the Force Accounting System, a lack of doctrine concerning management headquarters and the sustainment base, and a proliferation of new management requirements resulting from environmental changes (see Figure 27-1).

	FIELD OPERATING	STAFF SUPPORT
HQDA AGENCY	<p>EXECUTES POLICY</p> <p>MAY OPERATE WITHOUT HQDA</p>	<p>FORMULATES POLICY</p> <p>PROVIDES ADMIN/LOG SUPPORT FOR HQ</p> <p>EXISTS ONLY TO SUPPORT HQ</p>
MACOM ACTIVITY	<p>EXECUTES POLICY</p> <p>MAY OPERATE WITHOUT MACOM HQ</p>	<p>FORMULATES POLICY</p> <p>PROVIDES ADMIN/LOG SUPPORT FOR HQ</p> <p>EXISTS ONLY TO SUPPORT HQ</p>

Figure 27-1. Management of FOA and SSA

The ROBUST Task force asserts that the problems with the management system which was created to manage management headquarters and management headquarters activities are derived from problems stemming from definitions, a lack of simplicity and a lack of clarity.

The ROBUST Task Force has observed that existing definitions are inadequate. The definitions which are used for management headquarters and management headquarters activities in DODD 5100.73 are extensive. However, they are qualitative in

their character and require judgmental determinations, such as the percentage of an organization's manpower that is devoted to any of the thirty-two listed management functions. This requirement to quantify that which is essentially qualitative has resulted in an entire set of information management system requirements that have, to date, served to increase the complexity of the management of management headquarters.

FIELD OPERATING AGENCY:

A TDA organization which has the primary operational mission of executing policy, under the supervision of HQDA. It is not a MACOM or part of a MACOM. A field operating agency performs a unique or specialized mission; supports the entire Army; reports directly to a proponent ARSTAF or Secretariat directorate, but does not perform in a staff support role; and its mission would continue to exist in the absence of higher headquarters. A field operating agency may perform limited management support for, or incidental to, its operational mission.

FIELD OPERATING ACTIVITY:

A TDA organization which has the primary operational mission of executing policy, under the supervision of and reporting to a MACOM (or Major Army Subcommand). A field operating activity performs a unique or specialized mission; supports, as a minimum, the entire MACOM (or SubMacom), but does not perform in a staff support role; and its mission would continue to exist in the absence of higher headquarters. A field operating activity may perform limited management support, for, or incidental to, its operational mission.

The existing management system is complex. AR 570-8 requires HQDA approval prior to any reorganization or realignment which involves the discontinuance or elimination of AMHA functions. It is ironic that the system designed to control the number and size of management headquarters requires compliance with an entire series of administrative, bureaucratic requirements before efficiencies can be initiated. There is little incentive for complying with the bureaucratic procedures contained in the regulation.

AR 570-8 has not been updated for thirteen years. One of the purposes of the regulation is the identification of Army management headquarters activities. These are listed in Appendix A of the regulation. Little imagination is required to accurately guess the accuracy of this listing. One of the major problems with FOA management is the fact that it is not clear which activities are FOA and which are not.

ARMY MANAGEMENT HEADQUARTERS ACTIVITIES (AMHs)

The ROBUST Task Force asserts that an appropriate HQDA response to this situation is less rather than more management. Management headquarter and manage-

ment headquarters activities should be managed as cost centers. HQDA should allocate resources, manpower and funds, to the management headquarters according to the activities for which they are responsible. The previous fifteen years bear adequate witness to the futility of attempting to develop a series of useful definitions that differentiate management from operations. In fact, operations is one of the thirty-two management functions listed in DODD 5100.73. HQDA should develop a plan to eliminate SSA and FOA. The functions that these organizations perform should either be transferred back to the management headquarters, without an increase in manpower, assigned to major subordinate commands, or assigned to functional centers (see Chapter 29).

Army Management Headquarters Activities (AMHA) are those activities which provide management or direct support to the programs and operations of the Army, its major military units, organizations, or agencies. This is a much simplified, paraphrased definition of AMHA from the DOD Directive 5100.73, dated January 7, 1985. The definition of AMHA has evolved from a simple definition in 1973 to a convoluted set of definitions and rules, which are difficult to understand or implement; from a basic definition which covered four functions to one that includes 32 functions.

The original purpose of the definition of management headquarters was to separate management and operational headquarters and establish a common system of accounting for management headquarters strength. By defining and accounting, the growth and proliferation of management headquarters could be monitored and managed. Thus, both Departmental and Congressional concerns and criticisms could be allayed. The definitions and rules, however, have not kept pace with the departmental reorganizations, such as those required under the Goldwater-Nichols Reorganization Act of 1986. The Army's implementing regulation is dated 1975, although it is currently under revision.

When the headquarters is targeted for a reduction, it is generally AMHA which is the target, not any particular function within the headquarters. This was true in the 1977 25% reduction mandated by OSD, as well as the 3% headquarters reduction Congressionally mandated in FY 84. AMHA is the instrument by which headquarters size is managed.

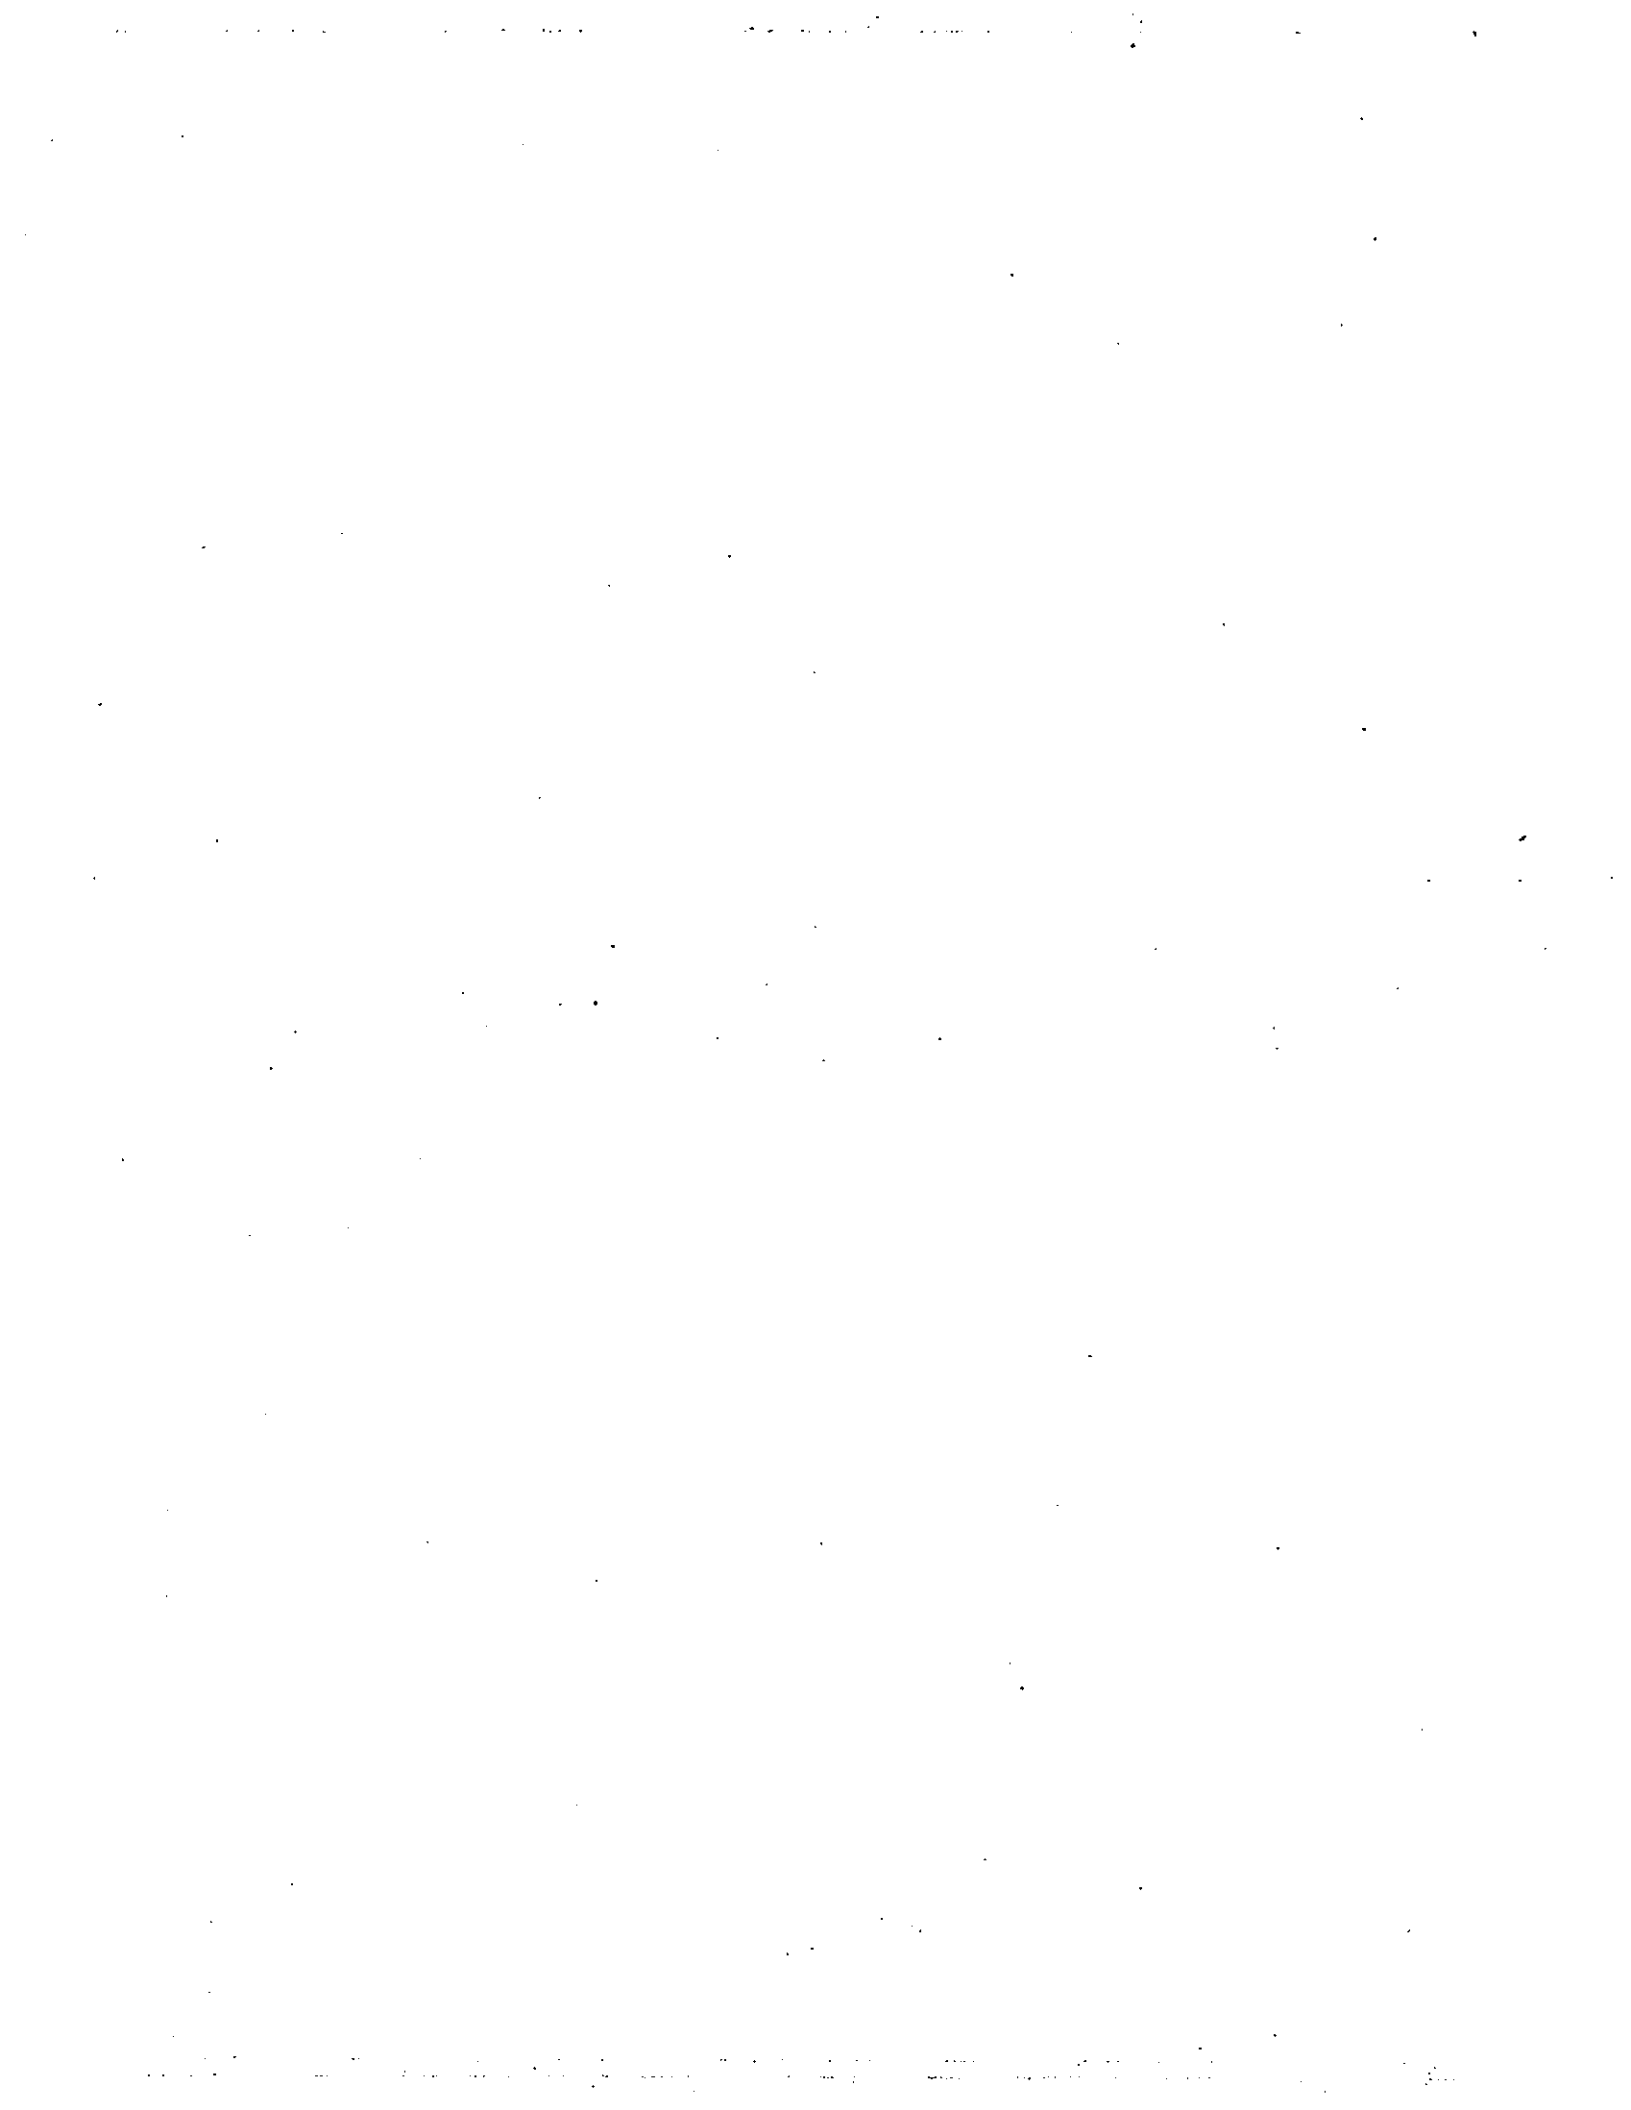

The list of AMHA contained in the DOD Directive gives the appearance of inconsistencies; all the MACOMs are listed, however, only two MACOMS - AMC and FORSCOM list major Subordinate Commands. Among the MACOMs, it is difficult to see the rationale for this designation. It could be argued that some of the AMC subordinate headquarters are operational in the management of production, while the subor-

dinate CONUSAs of FORSCOM are management headquarters, and have little impact on "operations."

Our review of the AMHA AMSCODEs identified that, excluding Defense and Joint activities, there are 17,168 authorizations in the AMHA (Annex B to this chapter).
