DPW – ArMA (Army Maintenance Application)

We encourage all to register for the ArMA system

- **Effective April 8, 2023, ArMA will be the only accepted method to report facility work orders, except those that are emergency work orders.** The use of ArMA will increase the communication with tenants in Army managed facilities to ensure the safety, health, and welfare of our Workers, Soldiers and Families.
- Work orders can be completed using any computer or handheld device, and allows pictures to help explain the problem. Pictures are highly encouraged!
- ArMA provides transparency on the status of work orders.
- Publicly available application/website that can be accessed from computers and mobile devices to set up your individual accounts can be found at:
<https://www.armymaintenance.com>. This is where you can set up your account and report work orders.
- ArMA is also available through the Digital Garrison App.
