

# FORT JOHNSON, LA TO THE PORT OF BEAUMONT AND PORT ARTHUR, TX

## POWER PROJECTION PLATFORM (PPP) ROUTE

26 March 2024

**BACKGROUND:** Power Projection Platforms (PPPs) are defined as military installations that strategically deploy one or more high-priority active component brigade and/or mobilize and deploy high-priority reserve component units. Increased deployment activity requiring a fast and coordinated response has become the normal operational standard within the continental United States. Routes between PPP installations and their designated Air and Sea Ports of Embarkation (APOEs/ SPOEs) are termed PPP Routes. PPP Routes, a subset of the STRATEGIC Highway NETwork (STRAHNET), are the most critical 5,000 miles of public roadways for supporting the safe, rapid, and efficient movement of DoD personnel and equipment. Highways for National Defense (HND) mission requirements call for ensuring PPP Routes are maintained at a capable design, performance, and condition standard to support national emergency deployments.

**INSTALLATION:** Fort Johnson comprises 198,000 acres in Vernon Parish, Louisiana with 100,000 acres owned by the Department of the Army and the remaining 98,000 acres owned by the U.S. Forest Service. It is located ten miles east of Leesville, Louisiana and 30 miles north of DeRidder, Louisiana. The installation's primary SPOE is the Port of Beaumont and Port Arthur.
