

Military Surface Deployment and Distribution Command

Customer and Carrier Advisory

September 18, 2025

CA-25-09-18/0057

Subject: Cargo Movement Protocol for Camp Simba Manda Bay, Kenya (L1T)

Purpose: Advise DoD shippers regarding movement protocol for cargo destined for Camp Simba Manda Bay, Kenya and to address operational impacts resulting from improper routing and storage limitations at Camp Lemonnier, Djibouti.

Be Advised: Immediate and strict adherence to the following cargo movement protocol is required to prevent operational disruptions:

1. All cargo ultimately consigned for Camp Simba Manda Bay, Kenya, must be requisitioned and processed exclusively utilizing DoDAAC FY2562 APOD L1T. This requirement ensures direct and timely delivery to the intended destination.

2. Any cargo ultimately consigned for Camp Simba Manda Bay, Kenya, requisitioned and processed with DoDAAC FB5807 APOD JIB will be terminated at Camp Lemonnier, Djibouti, regardless of the intended destination. This improper routing directly causes avoidable cargo rehandling, resulting in movement delays and contributes to a backlog of essential supplies at an operational hub.

Failure to comply with this Customer Advisory will result in significant delays for your shipments and impacts mission readiness and resource allocation.
