Prepared by: Cindy L Howell

IFR is all around us, and I'm afraid it's going to creep into the Class D soon. We should be VFR by 10-11L, and the PM looks MVFR. IFR returns by 22L and lingers into tomorrow's AM. A cold front will swing thru late tomorrow, bringing in some much-needed rain. Expect showers/ISOLD TS and gusty surface winds (G20kts) for the PM/N1 periods. By Sunday AM, the rain is gone, skies are scattered out, and winds are howling. We'll see wind gusts up to 28kts, and temps will take a plunge!
