

The Army's modern, authoritative source for Soldier and Civilian training data

ARMY TRAINING INFORMATION SYSTEM

WHAT IS ATIS?

The Army Training Information System (ATIS) develops, integrates, tests, delivers, operates and maintains an enterprise capability for the Army training and education community. With all data and capabilities in one suite of applications, unit training management is easier than ever. ATIS provides the ability to see all aspects of training in one location, from scheduling facilities and coordinating resources through evaluating and certifying unit readiness.

WHAT DOES ATIS DO?

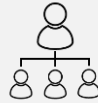

- › **Training Development** – Doctrine tasks that need to be trained
- › **Enterprise Scheduling** – Enterprise scheduling tools supporting all aspects of training
- › **Training Resourcing** – Live-fire range operations, training aids, knowledge management
- › **Training Management** – Planning, recording, synchronizing and reporting
- › **Learning** – Provides skills needed to support training and education

Subsumes **21** Legacy Systems

1st Program of Record to achieve a Continuous Authority to Operate

1st Program of Record to transition an Army Software Factory application to an Enterprise Tool

VISION

To be the premier enterprise application and service provider advancing the Army's mission to fight and win.

MISSION

Develop and implement training information solutions to drive change and enable leaders with modernized tools to build and train cohesive, lethal and combat-ready formations.

MAGNITUDE

- Army-wide Release 1QFY26
- ATIS Training – Vice Chief of Staff of the Army priority effort
- Range Management for 142 global locations – Army, USMC, Navy and Federal Law Enforcement
- 30K training events per month

TOP GOALS & PRIORITIES

Why we do what we do, every day:

- Streamlining systems through consolidation and divestiture to deliver a more efficient training information environment.
- Continued improvements of ATIS systems and applications through the integration of user experience research and feedback.
- System modernization to meet the needs of today's warriors with intuitive, responsive and effective tools and applications.
