PM LOG-F$N

PROJECT MANAGER LOGISTICS-FINANCE

WHAT IS PM LOG-FIN?

A solutions development organization that drives Warfighter readiness by managing the global supply chain from the Organic Industrial Base to the tactical edge.

WHAT DOES PM LOG-FIN DO?

PM LOG-FIN enables worldwide operations and provides enterprise-level financial and logistical support to ensure the Army is resourced, audit-ready and prepared for multidomain operations.

WHO WE ARE

- Army's enterprise resource planning (ERP) technical experts.
- Acquisition professionals who are bringing innovation to technical contracts.
- Users of industry's best practices.
  - Low Code / No Code Approach
  - Soldier-Centered Design
  - Program-Based, Outcome-Driven Solutions

Products: GCSS-Army, GFEBS, LMP, AESIP Hub, RF-ITV, PBUSE, TC AIMS II, SAAS-MOD, Enterprise Cloud Tools

6 flagship logistics systems managing **35M+ daily** transactions tracking vehicles, maintenance, supply, aviation & property book

$190B+ annual obligations supporting 227 countries and 1 million daily transactions

VISION

Transform and unify financial and logistics systems to meet the demands of large-scale combat and sustainment missions.

MISSION

Enable worldwide operations and provide enterprise-level financial and logistical support to ensure the Army is resourced, audit-ready and prepared for multidomain operations.

MAGNITUDE

- Over 35 million daily business transactions.
- Processes approximately $19.8B+ in Army Working Capital Fund (ACWF), and $100B+ in equipment & inventory; with over 1000+ interfaces.
- TC-AIMS & RF-ITV track 100k+ vehicles traveling millions of miles/year globally.
- SAAS is actively deployed at 131 Ammunition Supply Points worldwide to receive, store and issue ammunition.
- Support the Total Army: Active, Guard & Reserve Soldiers and Army Civilians

2027 GOALS & PRIORITIES

LOG-FIN Modernization

- Streamline, standardize and unify business operations while improving auditability through calls for solutions.
- Improve the user experience and increase efficiency across software platforms
- Modernize Army business operations and consolidate data into a modern, digital ecosystem.

ERPs

- Sustain current ERPs by maintaining the operational stability, performance, and reliability.
- Reduce ERP sustainment costs by optimizing processes, contracts and technologies to decrease the total cost of ownership.
- Achieve audit readiness by ensuring data integrity, traceability, internal controls and compliance to support full auditability.
- Support application upgrades, cloud-aligned architectures and updated SAP core capabilities.

Logistics Information Systems

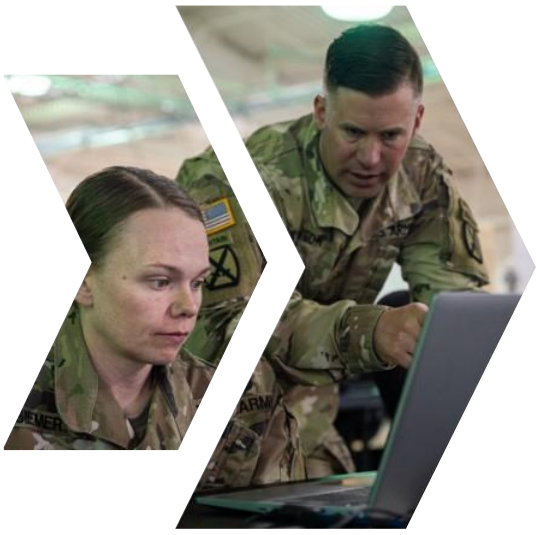

- SAAS – Maintain availability and cybersecurity compliant until subsumed through modernized systems.
- RF-ITV – Sustain and improve RF-ITV capability without breaks in service, while rigorously managing cost, schedule, and performance.
- PBUSE – Continue providing support to the Special Operations Commands.
- TC AIMS II – Collaborate with key stakeholders to transition legacy capabilities into modern systems.

BY THE NUMBERS

200k+
Unique users across all major commands

18+
Key stakeholders and supporters

42+
Major Army capabilities across the finance and logistics enterprise will be integrated
