Prepared by: Cindy L Howell

Once again, the LFA is VFR. And once again, the PM period should remain dry. That more comfortable air will be pushing in today, so the humidity will be noticeably lower. Winds will pick up today with gusts up to 20kts possible. Tomorrow looks similar in terms of temperature, humidity, and gusty winds. By Friday, we'll heat up again, remaining VFR, and by the weekend, rain chances will return to the Wiregrass.
