

MILITARY POLICE FORCE STRATEGY 2020

Strategic Environment:

The Army will continue to confront a series of complex, dynamic, and unanticipated challenges to both our national security and the collective security of our allies and partners. We anticipate a wide range of threats that incorporate regular and irregular warfare, terrorism, criminality and homegrown violent extremism. Criminals operating transnationally, nationally, or locally will have the ability to negatively impact the operational environment and undermine U.S. and partner efforts. Violent crimes and disorder can undermine public morals, cause fear, and weaken the rule of law creating greater instability. Fiscal constraints, diminished economic opportunities and unsustainable population growth will impact crime and criminality. The Army's ability to conduct decisive action in Unified Land Operations will require a force that is equally skilled in the policing and corrections across the range of military operations.

Mission: Provide professional policing, investigations, corrections and security support across the full range of military operations in order to enable protection and promote the rule of law.

Vision: A premier integrated Military Police force recognized as policing, investigations and corrections professionals who enable the Army's action in unified land operations in concert with our partners to achieve tactical, operational, and strategic outcomes in an unstable and complex environment worldwide.
