

INCREMENT 2 WAVE 3

EXTENDED AMMUNITION

OVERVIEW

The Army Materiel Command (AMC) National-level ammunition management processes used to require multiple systems to receive, store, survey, and issue ammunition. The integration of multiple systems caused timing issues, impacting real-time visibility and accountability of ammunition assets. One of the systems was the LMP Increment 1, which managed ammunition utilizing a third-party software to transfer data from ammunition plants and warehouses into the LMP system. With the LMP Increment 2 Wave 3 Extended Ammunition functionality, the “middle man” is removed and data goes directly from standardized, Automatic Identification Technology (AIT) handheld devices into the LMP.

Bottom line, Extended Ammunition capabilities minimize interfaces to the LMP and provide improved ammunition data timeliness and accuracy, with increased economy, efficiency, and effectiveness.

AMMUNITION Details

THE EXTENDED AMMUNITION CAPABILITY:

- Automates and streamline the ammunition management processes by standardizing the AIT
- Reduces data entry time
- Improves visibility of material receipt and shipment performance metrics
- Utilizes standard business processes across ammunition plants and warehouses

WIRELESS IS NOT AN OPTION

Because of the volatility of ammunition, using wireless handheld devices to track inventory was not an option. With Extended Ammunition functionality, the ammunition plant workforce uses a standardized AIT handheld device to scan items and data is stored directly to that device. Once all items are scanned, users return to their workstation to dock the device and download the data directly into the LMP.

Overall Increment 2 Wave 3 Capabilities

- National Maintenance Program (NMP)
- Extended Ammunition (AMMO)
- Expanded Industrial Base (EIB)
- Non-Army Managed Items (NAMI) (Logistical Reassignment (LR) Gaining Item Manager (GIM))
- Enterprise Resource Planning (ERP) Integration and Reengineering (General Fund Enterprise Business System (GFEBS) Interface)

Who is getting EXTENDED AMMUNITION

- Joint Munition Command (JMC)
- Anniston Defense Munitions Center (ADMC)
- Hawthorne Army Depot (HWAD)
- Blue Grass Army Depot (BGAD)
- Crane Army Ammunition Activity (CAAA)
- Letterkenny Munitions Center (LEMC)
- McAlester Ammunition (MCAAP)
- Pine Bluff Arsenal (PBA)
- Toole Army Depot (TEAD)
