# Leader's Corner

CSM Kevin  
Campbell

Over the past 45 days since taking responsibility of this awesome brigade I have been impressed with the morale and collective efforts of the team. I have had immense pleasure to not only see the LifeLiners in action, you have allowed me to be a part of your training events. From Convoy Live-fire Exercises, Base Defense Drills to some challenging PRT sessions. The professionalism at what you do was evident by the team's success at the Warfighter 20-01 (WFX-20-01). You not only succeeded at your missions but you also kept the 101st Airborne Division (Air Assault) in the fight to earn 'T' proficiency ratings in all our tasks, all while being the first brigade evaluated under the new FM 4.0 Doctrine. Going forward, I readily accept the challenge to ensure every Soldier in the LifeLiners Brigade is "Tactically Sound and Technically Proficient". We will implement systems and processes that will survive our tenure that others can build upon. The success of this brigade depend on each of us and I look forward to that journey. Some things we need to look at are maintenance (ourselves and all of our equipment), ACFT, readiness (PRR, MEDPROS, etc....), discipline and standards, tactical mindset, Leader Training Time, Air Assault, and Ranger School.

Going forward, I ask that we look at those thing that we are not doing so well at and improve on those, codify best practices, and continually employ the principles of leadership at all levels. I implore everyone to take care our each other and take care of our families. Thanks for all you do every day!

Excellence to the Line!

## Safety

Mr. Gordon  
Morgan

Lifeliners Team,

According to the National Fire Protection Association, home fires cause more than 4,000 deaths and tens of thousands of injuries each year in the United States. Many of those incidents are caused from fireplaces, space heaters, and stoves. Any fuel-burning system should be serviced by a professional at the beginning of the heating season to make sure that all systems are operating properly. The damper, vents, and chimney should be checked regularly to ensure proper operation. And always keep a fire extinguisher handy wherever there is a risk of fire.
